EDUCATION

University of California, San Diego (UCSD)

M.S. in Computer Science; GPA: 3.86/4

La Jolla, CA

Sept. 2021 – Dec. 2022(expected)

University of Electronic Science and Technology of China (UESTC)

B.E. in Computer Science; GPA: 3.98/4, WAM: 92.1/100, Ranking: 1/242

Chengdu, China

Sept. 2016 – July 2020

PROFESSIONAL EXPERIENCE

Salesforce

San Francisco, CA

Software Engineer Intern - Cloud Infrastructure, Hyperforce

June 2022 – Present

- Originated an event-driven service that periodically builds and destroys any service with orchestration and stamps a successful set of artifacts, increasing the confidence level of **OaaS (Orchestration as a Service) Cloud Platform**.
- Built the service in **Java**, which submits **RESTful** requests through a web client based on **Reactive Spring** and tracks them with **Amazon SQS**, performing thorough rehearsals of building the services and powering all Salesforce deployments across multi-substrate (AWS, Azure, GCP, Alibaba, and Blackjack).

Nokia

Hangzhou, China

Full-time Software Engineer, Scrum Master - R&D Center

Aug. 2020 – June 2021

- Led a scrum team of eight members, originated *Gatekeeper*, a web application powering global team's R&D closed-loop system by automating inspection and maintenance of design documents, and hold **end-to-end ownership** of it.
- Designed the whole architecture of *Gatekeeper*, including back-end, front-end, testing and CI/CD, implemented it with **React**, **Spring Boot** and **MongoDB**, deployed **vSphere** and **Jenkins** services and **dockerized** them, serving 1k+ system engineers at Nokia Networks division.
- Devised and developed a **RESTful** file transfer proxy in **Java** with **Jersey** and **Tomcat**, opening a channel to extend the scope of authority and providing the foundation for the infrastructure team's products.
- Refactored the daily report-generating python scripts interacted with 100k+ Nokia's employees records per day following **Clean Code**, optimized the structure by replacing redundant SQL queries with an independent **LDAP** traversal and maintenance service and introducing reusability and scalability by providing several APIs, reducing the average running time **from 2h to 39s** ↓.

Nokia

Hangzhou, China

Software Engineer Intern - R&D Center

Apr. 2020 – June 2020

- Devised a method to optimize workflow by collecting progress data of features from Power BI and Gerrit and generating slides automatically, designed a multi-threaded crawler application in **Python** with **PyQt**, **Requests**, **Selenium** and **Multiprocessing**, reducing a **man-day** ↓ in every two weeks.
- Built workflow tool-kits such as HTML automatic generator, email robot, mock testing, DAO helper, authentication module disassembled from 50k+ lines of VBA code, etc., **promoted them in Nokia's software development team**.

SELECTED PROJECTS

- **Fault-tolerant Cloud Storage System:**
Constructed a cloud-based Dropbox-like file storage application that synchronizes files via **gRPC** in **Go** and made it fault-tolerant based on the **RAFT** protocol.
- **Online Compiler and PERL:**
Contributed to an online compiler and REPL of Python which translates source code to **WebAssembly**, collaborated with 40+ developers to implement it in **TypeScript** and designed the memory management module using **static linked list**.

PUBLICATIONS

- *STEAM: Self-Supervised Taxonomy Expansion with Mini-Paths*, accepted by *Proc. KDD*, 2020.
- *Hunt Protagonist of Sentiment: Sentiment Analysis via Capsule Network with Sentiment-Aspect Reconstruction*, accepted by *Proc. DASFAA*, 2021.

SELECTED SKILLS

Programming: Python, Java, Go, C/C++, JavaScript/TypeScript, Shell Script, SQL, HTML, CSS, Matlab, VBA

Tools: Git, Jenkins, Docker, Spring Boot, Jersey, React, MongoDB, SQLite, SQL Server, Tomcat, Nginx, vSphere, AWS
